Activity information ("the activities") & participant fitness requirement

The BC Sailing Safety at Sea Offshore Personal Survival Course is for sailors who are participating in distance and offshore races and cruises. The course includes classroom and practical sessions. Topics covered include safety equipment, storm sails, heavy weather, man overboard, forecasting, signals and communications. Practical sessions include inflating and using lifejackets, life rafts and other safety equipment in a pool environment. Participants who successfully complete the course will receive a BC Sailing Safety at Sea certificate, valid for five years.

- The training is physically demanding and requires the ability to swim.
- Participants will enter the water in foul weather gear, swim with and without lifejackets, inflate, right and board life rafts, and assist other participants in the water.
- It is the responsibility of participants to be fit for the training. Participants who have any doubt about their ability to participate safely should consult their doctor and obtain a medical certificate before participating.

I FREELY ACCEPT AND FULLY

In consideration of the RELEASEES agreeing to my participation in the activities and permitting my use of their equipment, parking and other facilities, and for other good and valuable consideration, the receipt and sufficiency of which is acknowledged, I hereby agree as follows:
